Maximise Revenue.

COMax UltraPulsed Fractional Laser

50W/60W/80W

The Science Behind Skin Transformation

Fractional laser creates thousands of tiny micro-channels, 2-4mm deep, in the skin.

Controlled heat exfoliates damaged layers, stimulates coagulation, and forms thermal bridges for faster healing.

Activates self-healing to regenerate collagen, rebuild the dermal structure, smooth wrinkles, and rejuvenate skin.

How COMax Delivers Results Patients Will Love

The COMax Fractional CO2 Laser delivers a 10600nm wavelength laser with pinpoint accuracy, creating micro-focused spots as small as 50-80 microns. This cutting-edge technology achieves:

- **Precise Micro-Holes:** Targets problem areas with pinpoint accuracy for faster healing and visible results.
- **Thermal Effect:** Boosts natural skin renewal while being gentle on surrounding tissue.
- **Collagen Boost:** Rebuilds dermal support for firmer, smoother, and younger-looking skin.

This process activates the three key stages of skin repair—inflammation, proliferation, and remodelling—to stimulate collagen production, rebuild the skin's support structure, and deliver dramatic results:

- **Facial Contour Enhancement:** Naturally lift and firm the skin.
- **Wrinkle Reduction:** Minimize fine lines for a smoother appearance.
- **Skin Texture Refinement:** Achieve silky, flawless skin.
- **Acne Scar Improvement:** Significantly reduce the appearance of scars.

With COMax, your patients will experience a comprehensive transformation in skin health and beauty.

COMax: The Ultimate Versatile Tool for Your Clinic

Expand Your Services. Attract More Patients.

With its advanced CO2 fractional laser technology, COMax allows your clinic to offer a comprehensive range of treatments that cater to a variety of patient needs. Here's the full list of solutions COMax provides:

Skin Rejuvenation and Resurfacing Treatments

- **Fine Lines and Wrinkles:** Effectively reduce wrinkles, including areas where injectables are not ideal (e.g., around the eyes).
- **Skin Resurfacing:** Achieve smoother, even-toned skin by removing damaged outer layers.
- **Skin Tightening:** Non-surgical lifting and firming for sagging skin.
- **Rough Skin Texture and Enlarged Pores:** Deliver smoother, refined skin texture and minimize pore size.

Scar and Stretch Mark Treatments

- **Acne Scars:** Smooth pitted or rolling scars for clear, even skin.
 - **Stretch Marks:** Minimize the appearance of stretch marks caused by pregnancy, weight changes, or growth spurts.
 - **Surgical and Trauma Scars:** Improve the appearance of scars from injuries or surgeries.
-

Pigmentation and Skin Tone Improvements

- **Hyperpigmentation:** Lighten sunspots, age spots, and uneven skin tone.
- **Melasma:** Provide a non-aggressive option for treating this challenging pigmentation issue.
- **Sun Damage Repair:** Revitalize skin damaged by UV exposure.

Cutting and Lesion Removal Treatments

- **Skin Tags:** Quick and precise removal of unwanted skin tags.
- **Warts:** Effectively treat and remove flat, common, and plantar warts.
- **Moles:** Safely remove benign moles with precision.
- **Syringomas:** Remove small sweat gland growths commonly found around the eyes.
- **Seborrheic Keratosis:** Treat these benign, raised skin growths.
- **Fatty Granules (Milia):** Vaporize small white bumps under the skin.

Specialized and Advanced Solutions

- **Actinic Keratosis:** Treat precancerous skin lesions caused by sun exposure.
- **Post-Inflammatory Hyperpigmentation (PIH):** Address discoloration following skin trauma or acne.

Why Choose COMax for Your Clinic?

With COMax, your clinic can expand its treatment portfolio to attract a wider patient base and deliver effective, non-invasive solutions for a variety of skin concerns. This device is ideal for both facial and body treatments, giving patients confidence and visible results they'll love.
