At Aesthetics Consults, we are excited to introduce HydraGlow Pro, a revolutionary non-invasive skin cleansing and nourishing system that transforms skincare treatments. Powered by dual-power fluid vortex technology, this cutting-edge device delivers deep cleansing, exfoliation, hydration, and rejuvenation to help your patients achieve radiant, youthful skin.

Why Choose HydraGlow Pro?

HydraGlow Pro is designed for clinics looking to expand their offerings and deliver exceptional skincare results for patients of all skin types.

○

Key Features:

- **Dual-Power Fluid Vortex Technology:** Deep cleanses and nourishes the skin without irritation.
- **Multi-Technology Integration:** Includes vibrating superconductive handles, sonic spades, and hot/cold therapy.
- **Non-Invasive Hydration:** High-pressure water replenishment for maximum moisture.
- **Customised Treatments:** Tailored solutions for every skin type and concern.
- **Ergonomic Design:** Easy-to-use interface and lightweight handles for seamless operations.

Comprehensive Treatments with HydraGlow Pro

HydraGlow Pro offers a complete **skincare solution** that combines cleansing, hydration, and rejuvenation in just five steps.

Deep Cleansing

- Removes dirt, oil, and impurities from pores using negative pressure vortex adsorption.
- Features a 3-zone vortex probe for effective exfoliation, cleansing, and serum infusion.

Exfoliation & Texture Improvement

- Utilises high-frequency sonic vibration technology to exfoliate dead skin cells gently.
- Smoothens rough textures and prepares the skin for better product absorption.

Hydration & Nourishment:

- Non-invasive high-pressure hydration jets infuse natural plant extracts and serums.
- Boosts skin moisture levels, leaving it plump and radiant.

Hot & Cold Therapy

- **Hot mode:** Opens pores for better serum absorption.
- **Cold mode:** Soothes skin, reduces inflammation, and improves elasticity.

Rejuvenation & Glow

- Removes dirt, oil, and impurities from pores using negative pressure vortex adsorption.
- Features a 3-zone vortex probe for effective exfoliation, cleansing, and serum infusion.

How HydraGlow Pro Works

HydraGlow Pro combines the power of **vortex technology** and **multi-step treatment protocols** for optimal results:

1. Dual-Power Vortex

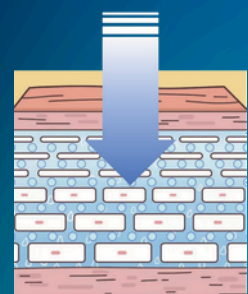

Removes impurities while introducing active ingredients into the skin

< Vibrating Superconducting Handles

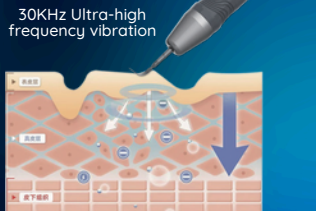

Enhancing absorption of products >

1.1MHz/s Vibration frequency

2. Negative Pressure Adsorption

Efficiently removes dirt from pores without damaging the skin

Sonic Spade Handles >

3. Hot/Cold Superconductive Handles

Enhances absorption and soothes sensitive areas

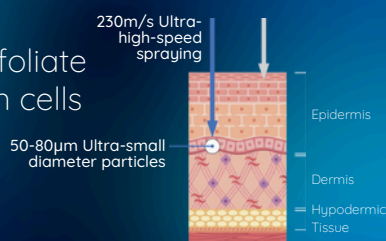

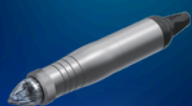

36-46°C High-temperature superconducting

0-6°C Low-temperature superconducting

Hot and cold superconducting handles >

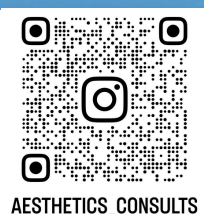

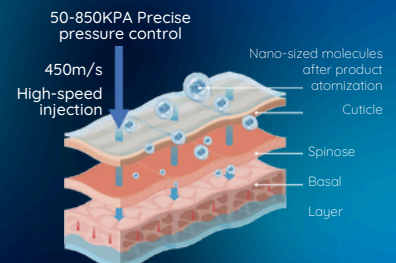

4. Sonic Spade Technology

Vibrates at high frequencies to exfoliate and stimulate skin cells

5. Serum Infusion:

Delivers hydrating and clarifying serums deep into the skin for lasting hydration

Frequently Asked Questions (FAQ)

- What is the treatment duration?

Each session takes approximately 30–45 minutes, depending on the patient's skin concerns.

- How many sessions are needed?

Patients often see results after the first session. For optimal results, 6–8 sessions are recommended.

- Is the treatment painful?

No, the treatment is non-invasive and comfortable. Most patients describe it as relaxing.

- Can HydraGlow Pro treat sensitive skin?

Yes, the gentle vortex and infusion technologies make HydraGlow Pro suitable for even the most sensitive skin types.

- How many sessions are needed?

Patients often see results after the first session. For optimal results, 6–8 sessions are recommended.
