# Welcome to OptiPulse IPL Technology

## Expand Your Clinic's Potential with OptiPulse IPL

The OptiPulse IPL System combines advanced Intense Pulsed Light (IPL) technology with Real OPT precision, delivering a wide range of treatments for your patients' skin and hair concerns.

### Why Choose OptiPulse?

- **VERSATILE TREATMENT RANGE:**  
From hair removal to pigmentation correction and vascular therapy
- **CUTTING-EDGE TECHNOLOGY:**  
Real OPT ensures precise energy delivery with uniformity and safety
- **CLINICIAN-FRIENDLY:**  
Intuitive touchscreen interface and high-speed output allow clinics to operate efficiently
- **PATIENT SATISFACTION:**  
Comfortable treatments with visible results in fewer sessions

# Complete List of *Treatments* with OptiPulse

One Device. Endless Possibilities.

The OptiPulse IPL System combines advanced Intense Pulsed Light (IPL) technology with Real OPT precision, delivering a wide range of treatments for your patients' skin and hair concerns.

## Skin Rejuvenation and Brightening:

- Reduce fine lines and wrinkles for a smoother appearance.
- Shrink pores and improve overall skin texture.
- Restore radiance and improve dull, uneven skin tone.

## Permanent Hair Removal:

- Remove unwanted hair from any part of the body.
- Effective on multiple hair types, including lighter hair tones.
- Pain-free and quick sessions for long-lasting results.

## Pigmentation Correction:

- Fade freckles, sunspots, age spots, and melasma.
- Treat post-inflammatory hyperpigmentation.

## Vascular Therapy:

- Eliminate spider veins, rosacea, and facial redness.
- Remove port-wine stains and small vascular lesions.

## Acne Management:

- Reduce active acne and prevent future breakouts.
- Shrink sebaceous glands to minimise oil production

# Why Clinics Love OptiPulse IPL

## Business Benefits:

- **Increase Revenue Streams:** Offer in-demand treatments for hair removal, pigmentation, and skin rejuvenation.
- **Attract New Patients:** With versatile solutions, meet the needs of a wider patient demographic.
- **Efficient Operations:** Faster treatments with high-speed output (10Hz) maximise patient turnover
- **Future-Proof Investment:** Upgradable functions to expand services as your clinic grows

## Patient Benefits:

- **Comfortable Experience:** Cooling technology ensures pain-free, safe treatments
- **Visible Results:** Patients see real improvements in fewer sessions.
- **Minimal Downtime:** Gentle treatments allow patients to return to their daily activities immediately.

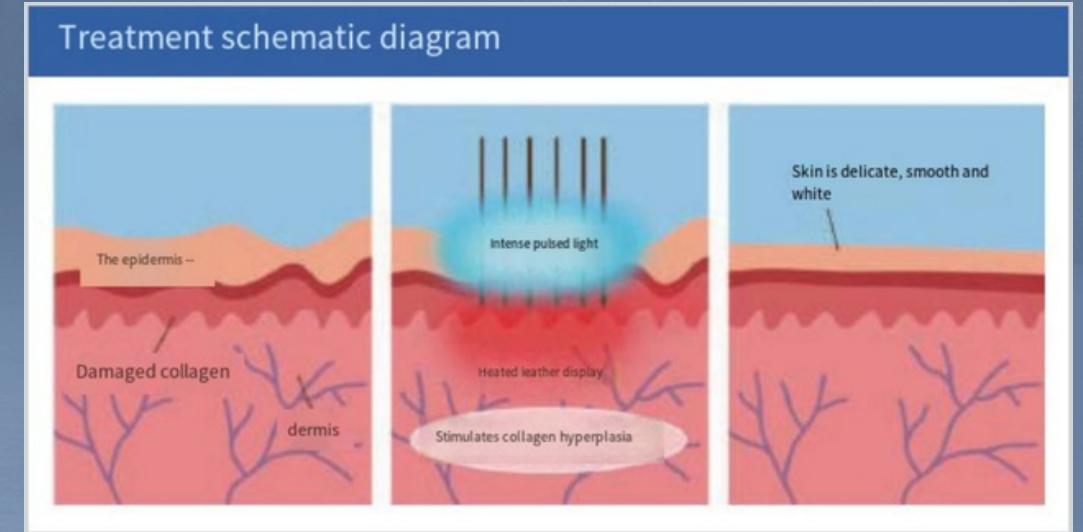

# The Technology Behind Superior Results

The OptiPulse IPL system leverages Real OPT Technology for consistent, safe, and effective energy delivery.

## Key Features:

- **Real OPT Technology:** Ensures precise and uniform energy delivery across every pulse for predictable results.
- **DPL Technology:** Advanced narrow-spectrum wavelengths (120nm) target pigmentation and vascular lesions more effectively.
- **Super Cooling Effect:** Protects the skin and ensures a comfortable experience for patients.

- Light penetrates the skin
- Collagen is regenerated, or hair follicles are disabled

- Heat targets melanin, blood vessels, or sebaceous glands

# A Device Built for Performance and Versatility

OptiPulse is designed for clinics aiming for efficient, high-performance solutions.
